-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims require "substantially lowers" (claim 1) or "significantly reduce" (claim 11). These terms are relative terms lacking proper comparative basis. The use of these terms makes claims indefinite.

Claims 1-10 are indefinite because the term "the level of sound" lacks proper antecedent basis.

Claims 4-6 are indefinite because the term "the horizontal top surface" lacks proper antecedent basis.

Claims 4-6 are indefinite because the term "the bottom edge portion" lacks proper antecedent basis.

Claim 9 is indefinite because the term "the bottom edge portion" lacks proper antecedent basis.

Claim 9 is indefinite because the term "the sealing surface" lacks proper antecedent basis.

Claims 12-19 are indefinite because the term "the attenuating means" in claim 12 lacks proper antecedent basis.

Art Unit: 1746

Claim 16 is indefinite because the term "the bottom edge portion" lacks proper antecedent basis.

Claims 20-22 are indefinite because the term "the attenuating means" in claim 20 lacks proper antecedent basis.

Claims 21-22 are indefinite because the term "the dishwasher attenuating means" in claim 21 lacks proper antecedent basis.

Election/Restrictions

3. It is noted that the disclosure recites distinct species of the sound sealing arrangement (different seals, trays, connections between seal, tray, door, etc). The instant claims are indefinite and were interpreted at the best examiner's understanding. It is noted that an election of the species of the seal, tray, connecting arrangement could be made upon clarification of the claims.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-22 are rejected under 35 U.S.C. 102(b) as anticipated by Kaldenberg (US Patent No 3,529,881).

Art Unit: 1746

Kaldenberg teaches a dishwasher with sound proofing means. See entire document, especially Figure 5 and the related description.

The dishwasher of Kaldenberg comprises conventional parts, such as tub, walls, frame, etc.

The dishwasher comprises door (11), control (16), sound proofing panel (20), and front part (17).

The limitations of what is referenced by the claims as sound tray and flexible seal are met by the disclosure of the combination of part (20) and part (17).

For the claims requiring different shapes and connection arrangements of the claimed seal, portions of the seal and tray: it is noted that what is referenced by the claims as the sound tray can be interpreted as different combination of parts 17, 24, 33, 32.

As to claim 22, which requires a cable and actuating member attached to the cable and the tray: Kaldenberg teaches conventional control mechanism 16. Control mechanism 16 is connected to one end of part 23, which is interpreted as the actuating member. One end of part 23 is pivotally attached to parts 32, 33, 24, 17 (the sound tray). Control 16, which is attached to the other end of part 23, inherently includes attached electrical cables.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 6,539,955 and 7,041,377 and GB 2,201,866 are cited to show the state of the prior art with respect to sound isolation of dishwashers.
